Instructions for filling the sheet:
- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- **Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.**

Paragraph: Carbon compounds exhibit unique chemical properties due to the ability of carbon atoms to form strong bonds with themselves and other atoms. This property, known as _____, allows for the creation of complex molecular structures. In the case of oxidation, carbon compounds can react with oxygen to form _____ compounds, releasing energy in the process.

Answer bank: POLYMERIZE, REACTIVE, ENERGETIC, COMPLEXITY, STRONGLY, COVALENTLY, OXIDIZED, RELEASE

Q1. Carbon compounds exhibit unique chemical properties due to the ability of carbon atoms to form

_____ bonds with themselves and other atoms.

Q2. The property, known as

_____, allows for the creation of complex molecular structures.

Q3. This property enables carbon compounds to

_____ with oxygen to form oxidized compounds.

Q4. Oxidation can result in the release of

_____ energy in carbon compounds.

Q5. In the presence of oxygen, carbon compounds can

_____ into oxidized forms.

Q6. The strong bonds between carbon atoms enable them to

_____ and form complex molecules.

Q7. The ability of carbon atoms to form strong bonds with other atoms is a key aspect of their

_____ nature.

Q8. Carbon compounds can be

_____ by oxidation reactions, releasing energy in the process.

Q9. This unique property allows carbon compounds to be highly

_____ and reactive.
