Instructions for filling the sheet:
- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- **Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.**

Paragraph: Carbon compounds can undergo substitution reactions, which involve replacing one functional group with another. In this type of reaction, a _____ (1) molecule attaches to a carbon atom in place of an existing group. This process often requires the presence of a _____ (2) and may result in the formation of a new compound with unique properties. Substitution reactions are important in fields like _____ (3), where they are used to synthesize new materials. Chemists must carefully control reaction conditions, such as temperature and catalysts, to achieve successful _____ (4). The resulting compounds can have improved properties, making them useful for a variety of _____ (5) applications.

Answer bank: MOLECULE, PRESENCE, FIELDS, CONDITIONS, CATALYSTS

Q1. Carbon compounds can undergo substitution reactions, which involve replacing one functional group with another. In this type of reaction, a _____ molecule attaches to a carbon atom in place of an existing group.

Q2. This process often requires the presence of a _____ and may result in the formation of a new compound with unique properties.

Q3. Substitution reactions are important in _____ where they are used to synthesize new materials.

Q4. CHEMISTS must carefully control reaction _____ , such as temperature and catalysts, to achieve successful substitution.

Q5. The resulting compounds can have improved properties, making them useful for a variety of | | | | | | | | | | applications.
