Instructions for filling the sheet:
- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- **Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.**

Paragraph: Ethanols physical properties include being a liquid at room temperature, having a density slightly higher than water, and exhibiting some solubility in water. Its melting point is relatively low, ranging from 129 to 153 degrees Celsius. Furthermore, ethanol has a characteristic sweet odor, which contributes to its use as a solvent in various industries. Additionally, it can be used as a fuel source due to its energy density and combustion properties.

Answer bank: SOLVENT, DENSITY, ODOR, MELTING, FUEL, ROOM, DEGREES, CHARACTERISTIC

Q1. Ethanols physical properties include being a liquid at _____ temperature, having a density slightly higher than water, and exhibiting some solubility in water.

Q2. Ethanols melting point is relatively low, ranging from _____ to 153 degrees Celsius.

Q3. Furthermore, ethanol has a _____ sweet odor, which contributes to its use as a _____ in various industries.

Q4.
Additionally, it can be used as a

__ source due to its energy density and combustion properties.

Q5.
Ethanols physical properties include being a liquid at

__ temperature, having a _____ slightly higher than water, and exhibiting some solubility in water.

Q6.
Ethanols melting point is relatively low, ranging from 129 to

__ degrees Celsius.

Q7.
Furthestmore, ethanol has a

__ sweet odor, which contributes to its use as a _____ in various industries.

Q8.
Furthermore, ethanol has a

__ sweet odor, which contributes to its use as a _____ in various industries.

Q9.
Ethanols melting point is relatively low, ranging from 129 to 153 degrees

__.
