Instructions for filling the sheet:
- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- **Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.**

Paragraph: Ethanolic acid, also known as acetic acid or vinegar, is a colourless liquid with _____ solubility in water. It has a distinctive pungent smell and is commonly found naturally in fermented foods such as yogurt and cheese. This acidic compound has a molecular formula of CH3COOH and a density of _____. Its boiling point is 118°C at standard pressure, making it easily vapourised. Ethanoic acid is a key component in the production of _____, a popular food preservative. It also serves as an important ingredient in many cosmetic products due to its antimicrobial properties.

Answer bank: SOLUBILITY, DENSITY, PRESERVATIVE, INGREDIENT, COLOURLESS, PUNGENT, MOLECULAR, COMPONENT

Q1. Ethanolic acid has _ solubility in water.

Q2. The density of ethanoic acid is _.

Q3. This acidic compound is a key _ in the production of parabens.

Q4. Ethanoic acid serves as an important _ in many cosmetic products.

Q5. Its boiling point is 118°C at standard pressure, making it easily vapourised.

Q6. Ethanoic acid has a distinctive pungent smell and is commonly found naturally in fermented foods such as yogurt and cheese.

Q7. This acidic compound has a molecular formula of CH3COOH and a

_ of _____.

Q8. Ethanoic acid is a key component in the production of parabens, a popular food

_.

Q9.
Ethanoic acid also serves as an important ingredient due to its antimicrobial

_.
