Instructions for filling the sheet:
- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- **Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.**

Paragraph: The heating effect of electric current has numerous practical applications in our daily lives. For instance, it is used in the production of _____ and _____, where the heat generated by electric currents is utilized to melt metals or evaporate solvents. The process also finds application in the manufacture of glass, where the intense heat produced by the heating effect is used to melt the raw materials. Furthermore, the heating effect is employed in cooking appliances such as toasters and kettles, which rely on the controlled release of heat to cook food.

Answer bank: HEATING, METALS, PRODUCTION, APPLIANCES, EVAPORATE, MATERIALS, UTILIZED, RELEASE

Q1. _____ is used in the production of metals and materials.

Q2. The process also finds application in the manufacture of _____.

Q3. The intense heat produced by the heating effect is used to melt the _____.

Q4. Furthermore, the heating effect is employed in cooking _____.

Q5. The controlled release of _____ is relied upon to cook food.

Q6. It is used in the production of _____ and _____.

Q7. _____ is utilized to melt metals or evaporate solvents.

Q8. _____ relies on the controlled release of heat to cook food.
