Instructions for filling the sheet:
- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- **Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.**

Paragraph: Heterotrophic nutrition is a process by which organisms obtain energy from consuming other organisms or their byproducts. This type of nutrition is essential for many living things, including humans, as it provides the necessary building blocks for growth and development. In heterotrophic nutrition, organisms convert the chemical energy stored in the consumed materials into a form that can be used by their cells. For example, when we eat plants, animals or fungi, our bodies break down the complex molecules into simpler ones that can be absorbed and utilized.

Answer bank: ORGANISMS, CONSUME, ENERGY, GROWTH, DEVELOPMENT, CONVERT, MOLECULES, UTILIZED

Q1... Organisms obtain energy from consuming other _____ or their byproducts.

Q2... This type of nutrition provides the necessary building blocks for _____.

Q3... Heterotrophic organisms convert chemical energy stored in consumed materials into a form that can be used by their _____.

Q4... When we eat _____, our bodies break down complex molecules into simpler ones that can be _____.

Q5... Many living things, including humans, rely on heterotrophic nutrition for _____ and development.

Q6... Heterotrophic organisms consume other _____ or their byproducts to obtain energy.

Q7... The chemical energy stored in consumed materials is converted into a form that can be used by the organism's _____.

Q8... In heterotrophic nutrition, complex molecules are broken down into simpler ones that can be _____.
