Instructions for filling the sheet:
- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- **Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.**

Paragraph: When light passes from air into a rectangular glass slab, it undergoes _____ due to a difference in the speed of light between the two media. This phenomenon is known as refraction through a transparent medium like glass or plastic. The angle at which the light bends as it enters the glass slab is determined by the refractive indices of both the air and the glass.

Answer bank: ANGLE, BENDS, MEDIUM, PHASES, REFRACTS, SPEEDS, SLAB, TRANS

Q1. Light

as it passes from air into a rectangular glass slab.

Q2. The angle at which light
