Instructions for filling the sheet:

- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.

Paragraph: The magnetic field around a current-carrying wire is created by the motion of charged particles, such as electrons. This _____ (1) is strongest near the wire and weakens with distance. The direction of the magnetic field lines can be determined using the right-hand rule: point your thumb in the direction of the current flow, and your fingers will curl around to show the orientation of the _____ (2). The _____ (3) pattern formed by these lines is a characteristic feature of a magnetic field. When an electric current flows through a loop of wire, it creates a _____ (4) effect known as electromagnetic induction.

Answer bank: DIRECTION, ORIENTATION, PATTERN, EFFECT
