Instructions for filling the sheet:
- Don't fold the sheet. Use only ball pen. Read the given paragraph carefully.
- Below the paragraph, you will find questions with blanks.
- Use the Answer Bank provided to fill in the blanks with the most appropriate word(s).
- Each word/phrase from the Answer Bank can be used only once, unless stated otherwise.
- Write only the correct word(s) in the blank space provided.
- Spelling errors may result in the loss of marks.
- Do not use words that are not in the Answer Bank.
- Only use *UPPER CASE CAPITAL LETTER ALPHABETS* in the boxes.

Paragraph: Metals in the middle of the activity series can be extracted using a combination of chemical and physical processes. These metals include copper, zinc, silver, and gold. To extract these metals, a suitable reducing agent is used to reduce the metal ions to their pure form. This process is often more difficult than extracting metals at the top or bottom of the activity series because the reactions are less spontaneous. For example, copper can be extracted by heating its ore with carbon to produce copper and carbon dioxide.

Answer bank: REDUCE, CARBON, PROCESSES, SPONTANEOUS, EXAMPLE, HEATING, EXTRACTED, REACT

Q1.. Metals in the middle of the activity series can be

_ using a combination of chemical and physical processes. *(Answer: REDUCE)*

Q2.. The metals that include copper, zinc, silver, and gold are often more difficult to

_ than those at the top or bottom of the activity series. *(Answer: CARBON)*

Q3.. A suitable reducing agent is used to

_ metal ions to their pure form. *(Answer: PROCESSES)*

Q4.. This process is often less

_ than extracting metals at the top or bottom of the activity series because the reactions are less spontaneous. *(Answer: SPONTANEOUS)*

Q5.. Copper can be

_ by heating its ore with carbon to produce copper and carbon dioxide. *(Answer: EXAMPLE)*

Q6.. The reaction that produces copper and carbon dioxide is an example of a

_ process. *(Answer: HEATING)*

Q7.. Carbon is used as a reducing agent in the

_ process to extract copper. *(Answer: EXTRACTED)*

Q8.. The metals extracted from the middle of the activity series are often more

_ than those at the top or bottom because the reactions are less spontaneous. *(Answer: REACT)*

Q9.. The suitable reducing agent is used to

_ metal ions to their pure form.
