Worksheet & Answer Key

Our daily activities, from using plastic bags to throwing away food scraps, generate a significant amount of waste. This garbage can end up in landfills, oceans, and even our own backyards! To manage the mess we produce, we need to reduce, reuse, and recycle. By taking small steps like bringing reusable bags when shopping or composting food waste, we can make a big difference.

Word Bank:

reduce, reuse, recycle, oceans, backyards, generate, scraps, landfills

Fill in the blanks:

1. Sewage and other materials _____.

2. We need to _____ the amount of waste we produce.

3. The _____ can end up in oceans, landfills, or our own backyards.

4. To manage the garbage we produce, we need to _____., _____, and _____.

5. By taking small steps like bringing reusable bags when shopping, we can _____.

6. Foods scraps can be turned into nutrient-rich soil through _____.
